

PRODUCT BRIEF

TRC BLAZE THE TRIANGLE

In 1990 PUMA debuted its most advanced cushioning yet, TRINOMIC. Applied across a wide range and variety of shoes, this innovative technology was a hexagonal system in the sole that compressed and rebounded load. TRINOMIC brought a whole new angle to sneaker technology through harnessing three fundamental elements - cushioning, stability, and flexibility.

The Blaze of Glory made its original debut in 2006 as one of the most padded and plush versions of the TRINOMIC cushioning ever produced, designed with a unique upper, signature cage lacing system, and comfortable sock construction.

The **TRC Blaze** brings PUMA's futro design language – future meets retro – to the Blaze of Glory to create a new, innovative style. The style retains sock construction and an alternative take on branding but adds new features such as a lightweight and extremely comfortable double density

sole and a much-improved fitting. The style is rich in futro details, like the tooling code call-out on the back quarter cage and the 3-D tongue logo.

The **TRC Blaze The Triangle** drops on PUMA.com, PUMA stores and select retailers on May 5th.
